

Want to save hundreds of hours in manual creation and assignment of work schedules in SAP SuccessFactors?

Our Work Schedule Builder is a smart SAP extension that provides Hiring and Line Managers with a powerful easy to use scheduling interface, allowing them to easily create and search for and assign work patterns in SuccessFactors for current and incoming employees. The extension runs on SuccessFactors and automatically synchronises data between the HR and Payroll systems, drastically reducing time spent on employee rostering.

Work Schedule Builder makes rostering simple

Built on SAP's Business Technology Platform (BTP), Work Schedule Builder is a fully integrated extension delivering out-of-the-box connectivity and security. Once implemented, the tool supports user to:

- Search for an appropriate work schedule using a variety of filters
- Identify if the schedule already exists and, if not, create a new schedule concurrently in both SAP Employee Central and Employee Central Payroll
- Assign a work schedule to an applicant during the recruiting/job change process
- Creation of work schedules in Employee Central is replicated in real-time into Employee Central Payroll with no transports, or change management required

Key Benefits

Work Schedule Builder saves your business hundreds of hours by allowing managers and administrators to easily update and maintain employee work schedules as part of routine scheduling activities occurring frequently during recruitment, hiring and employee movements.

The tool automatically applies schedule information concurrently to the employee record in both SAP's Employee Central (EC) and Employee Central Payroll (ECP) systems, keeping data synchronised and eliminating the need for manual change management to keep data aligned.

The interface is easy to use and includes intuitive search and filtering functionality for previously designed rostering templates. You will see a reduction in the number of new schedules being created (a sign that users are finding it difficult to find prebuilt schedules in your system). Work Schedule Builder is built on BTP ensuring data is kept secure, the user experience remains seamless and the tool will work after each SAP SuccessFactors upgrade.

Saving time and money a real world case study

One customer saved \$45k p.a. here's how

Without Work Schedule Tool

	639	Staff paid in SAP
	497	Unique work schedules available
	3	Hours to create each new schedule
	50%	Casual & Part-time workforce (work schedules frequently change)
	10	Avg. schedules created per pay cycle
	\$58,500	Annual spend - updating work schedules in EC/ECP

With Work Schedule Tool

	0.15	Hours to create each new schedule
	2	Avg. schedules created per pay cycle
	\$12,500	Annual licence cost for Work Schedule Tool
	+\$45,000	Annual savings in reduced scheduling activities (includes licence fee cost)

A simple, powerful extension that is fully integrated with SAP SuccessFactors

Work Schedule Builder is fully integrated with SAP SuccessFactors ensuring simple, secure synchronisation of work schedule data within the SuccessFactors ecosystem

Quick Actions

Additional Actions

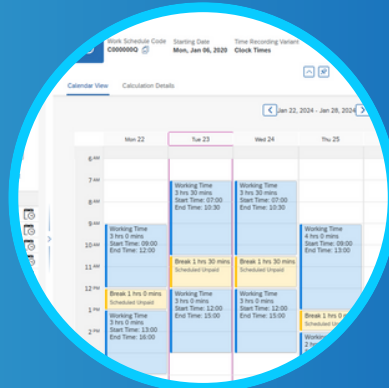

How it works

Work Schedule Builder is a fully integrated BTP extension. It uses SAP's secure native protocols to synchronise between your SAP SuccessFactors Employee Central (EC) and Employee Central Payroll (ECP) systems. Because this process works in real time your work schedules will be up to date across the entire SAP ecosystem, eliminating the need for manually updating and synchronising data between the 2 systems.

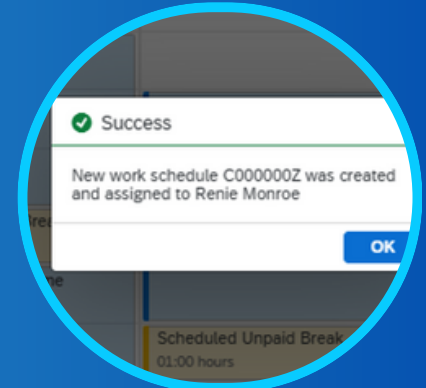

Create or modify schedules with the simple to use interface

Assign Work Schedule to new applicant or current employee in SuccessFactors

Work Schedule Builder does all the work in the background! Instantly updating both EC and ECP

Why Discovery Consulting

Specialists in SAP

Our sole focus is in SAP Products and Services. We have been developing specialist products since 2011.
